Objective

Computer Science undergraduate with hands-on experience building full-stack applications using Java, Spring Boot, and MySQL/MongoDB, backed by 3 self-built projects spanning backend APIs, real-time systems, and responsive UI development. Certified in cloud fundamentals (Oracle OCI) and AI basics (IBM), with a strong foundation in OOPs, DSA, and REST API design – and an equally strong willingness to learn from those with more experience. Seeking an entry-level Software Developer role where I can contribute meaningfully from day one, take feedback openly, and grow alongside the team – building long-term value for both my career and the organization.

Technical Skills

- **Programming Languages:** Java (Primary), Python
- **Frontend:** HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS
- **Backend:** Spring Boot, JDBC, REST APIs, Node.js, Express.js
- **Databases:** MySQL, MongoDB (Basic), MySQL Workbench
- **Tools & Platforms:** Git, GitHub, Postman, IntelliJ IDEA, VS Code
- **Operating Systems:** Windows, macOS, Ubuntu (Command Line)

Projects

- **Corporate Resource Management Booking Application** (*Java, Spring Boot, MySQL, REST APIs, Postman*)
Built a web-based corporate resource booking platform to streamline reservation and management of meeting rooms and shared office resources.
Designed RESTful APIs covering resource management, booking lifecycle, availability validation, cancellation, and booking history. Developed a normalized MySQL database schema and conducted functional and edge-case testing on 20+ REST API endpoints using Postman to verify correct request/response behavior and error handling.
- **CGPA Calculator & Predictor** (*HTML5, Tailwind CSS, JavaScript*)
Built a client-side web app that calculates real-time CGPA from dynamically added semester-wise SGPA and credit inputs, using the standard weighted-average formula.
Designed a Future SGPA Predictor feature that computes the exact SGPA required in an upcoming semester to hit a user-defined target CGPA, with contextual feedback for impossible or already-safe targets.
Implemented a fully responsive, animated glassmorphism UI using Tailwind CSS and vanilla JavaScript for DOM manipulation and live calculations – entirely client-side, no backend required.
- **RentaFleet – Motorcycle Fleet Management Platform** (*React, Node.js, Express.js, MongoDB, Tailwind CSS*)
Identified the problem of fragmented fleet tracking for motorcycle rental businesses and designed RentaFleet to solve it with a single real-time dashboard managing a fleet of 7+ vehicles across 3 role-based access tiers (Admin/Rider/Guest).
Designed the backend to be resilient by default: a React 19 frontend talks to an Express.js API, backed by a hybrid storage layer that quietly falls back to a local JSON store whenever MongoDB is unreachable – keeping the system running with zero downtime.
Built a live telemetry system syncing GPS odometer data and motion-sensor riding behavior from the rider's phone, dynamically adjusting range estimates by up to 15% and tracking maintenance intervals (6,000 km oil, 12,000 km brake fluid, 15,000 km tires) in real time.

Education

- **B.Tech, Computer Science & Engineering**, Madanapalle Institute of Technology & Science (MITS), AP (2023–2027) **CGPA: 7.92 / 10**
- **Intermediate (Class XII)**, Sri Chaitanya Jr. College, Madanapalle, AP (2021–2023) **74.7%**
- **Secondary School (Class X)**, Sri Chaitanya English Medium High School, Madanapalle, AP (2020–2021) **97%**

Certifications & Achievements

- HackerRank SQL – 4-Star Skill Badge
- HackerRank Java – Basic Certificate
- NASSCOM Gold Badge
- NPTEL: Privacy and Security in Online Social Media
- Quantum Fundamentals Program – Qubitech, WISER & Amaravati Quantum Valley (in association with APSCHE), 2026
- Deloitte Data Analytics Job Simulation – Forage, May 2026
- AI Autonomous Hackathon 2025 – Certificate of Participation, Siddhartha Academy of Higher Education, Vijayawada
- Attended hands-on technical training programs including Virtual Reality Development (MITS, Nov 2024) and a Java Full Stack Development bootcamp

Key Strengths & Languages

- **Key Strengths:** Adaptability, Creativity, Open-Mindedness, Teamwork, Logical Thinking
- **Languages Known:** Telugu (Native) — English (Professional Working Proficiency) — Hindi (Basic)
